Nest Building Challenge

You will need:
Scraps or any
waste materials
such as sticks,
leaves, cut grass,
can be done
inside with
recycled items
and a cuddly toy.

**Its next building season so lets see who
can build the best nest!**

- 1.To make this into a challenge you could use two sticks instead of your hand to mimic a beak or tie one hand behind your back.
- 2.To make even harder you can specify materials of only a certain size for the older children to even the odds of younger children playing at the same time.
- 3.Once you have made the nest you can paint hard boil eggs to add as an art activity to compliment the build.
